

**ABSTRACT OF THE DISCLOSURE**

A circular saw blade storage apparatus includes a panel having a  
5 first edge, a second edge, a third edge and a fourth edge. The first and  
second edges are positioned opposite of each other. A first housing is  
hingedly coupled to the first edge and a second housing is hingedly  
coupled to the second edge. The first and second housings each have a top  
side having a plurality of slots therein. The first and second housings may  
10 each be positioned on the panel so that the top sides face each other. Each  
of a plurality of saw blades may be removably extended into one of the  
slots so that the blades are stored within the housing.
